BOOKS TO PURCHASE
Paul Johnson, *Darwin: Portrait of a Genius*

READINGS ON MOODLE

COURSE OBJECTIVES
This course seeks to examine the development and interaction of the major civilizations of the world since about 1500. During the semester, you will be expected to
1. Discuss the major changes that impacted Western Europe through the Renaissance, Reformation, Scientific Revolution, and Enlightenment;
2. Understand the impact of European economic and colonial expansion into the non-Western world and how the major non-Western centers of civilization responded to it;
3. Analyze the origins and impact of what has been called the “dual revolution” in Western Europe — the political, economic, social, and intellectual changes set in train by the French and Industrial Revolutions;
4. Compare and contrast the process of modernization throughout the world in the 20th century, specifically the role of fascism, communism, national liberation movements, and the development of a global economy;
5. Understand the spatial location of geographic features and civilizations in relation to each other; and
6. Explain specific items within each of the above contexts as detailed on three study sheets, one for each test.
7. By doing all the above, improve your study, data retention, written composition, and time management skills.

ATTENDANCE
You’re responsible for the material covered at every class meeting. That means if you miss a class, you should get the notes from someone else. If you miss a lot, you’ll be reported to the Registrar’s Office. Excessive unexcused absences can lead to your being administratively dropped from the course. The U.S. Government doesn’t like people who take its money in financial aid and then fail to show up in class. The McMurry *Catalog* defines “excessive” as three or more such absences. While I won’t take off points from your grade for specific numbers of days missed, bear in mind that there is generally a direct relationship between attendance and grades. Since the same material is covered at both the 10:00 and the 11:00 sessions, you have two opportunities per day to get to the lectures.

TESTS AND QUIZZES
There will be a total of three (3) noncomprehensive tests during the semester (two midterms and a final). They will be half objective and half essay and will include map sections. Material will come from both the lectures and the reading assignments. Make-up tests are likely to be more difficult than the original versions unless you like all-essay tests. There will also be 6 brief quizzes, based on the online reserve articles, which can **not** be made up; a no-show counts as a zero. However, the two lowest quiz grades will not be counted in computing your final grade.
Everyone in the class will write a short (3-4 page) typed, double-spaced paper based on Paul Johnson’s *Darwin: Portrait of a Genius*. Specific details will be provided later in the semester. Late papers will lose two percentage points for every day past the stated due date, including weekends, up to a max of 10 points. Moral: plan to turn in your paper on time!

The six articles you’ll be reading to supplement the textbook are accessible in PDF format from your Moodle account. You can access Moodle either from the pull-down menus on the McMurry homepage (from Students scroll down to Moodle and click it) or you can go there directly by typing http://moodle.mcm.edu. Once at the main Moodle page, under My Courses, click World Civilization Since 1500. That should give you a list of the articles; and at that point, you simply click the one that you want to read.

You get out of a course what you put into it. There will be no provision in this class to make up substandard work; it is assumed that you will give everything your best shot the first time around.

Plagiarism, passing off the work of someone else as your own, will result at the very least in a zero grade on the assignment concerned and a referral to the Dean of Students for further disciplinary action.

McMurry University abides by Section 504 of the Rehabilitation Act of 1973, which stipulates that no otherwise qualified student shall be denied the benefits of an education “solely by reason of a handicap.” If you have a documented disability that may impact your performance in this class and for which you may be requesting accommodation, you must be registered with and provide documentation of your disability to the Disability Services Office, located in President Hall South. Arrangements will be made for students needing special accommodations.

Expect to be held accountable to the basic rules of considerate behavior as described in the McMurry University Student Handbook. Cell phones should be turned off during class. Your computer should also be turned off during class, unless you’re using its tablet feature to take notes; Facebook pages will not be covered on the tests. You should also take off your earplugs, for even if you’re listening to Beethoven, music isn’t compatible with history lectures. If the instructor gets tired of repeatedly having to remind you about these things, he may decide you’re not serious about taking the class and will administratively drop you from the course.

My contact information will be found on the upper right corner of the syllabus. If you lose your syllabus, you can download another from the Moodle page. If I need to send you any official communications, FERPA privacy regulations stipulate that I use your McMurry account, not any other mail account that you might have. If you never check your McMurry email, now might be a good time to change your habits.

The final course grade will be computed as follows: 21% for each of the three tests, 21% for the paper, and 16% for the average of the top four quizzes. The grade scale will be A: 90 to 100, B: 80 to 89, C: 70 to 79, D: 60 to 69, F: 59 and below. Within those parameters, plus and minus grades will be given: A: 93-100, A-: 90-92, B+: 87-89, B: 83-86, B-: 80-82, etc. There will be no A+ grades and no plus or minus grades for an F. Borderline cases (e.g., 89.6 or 79.8) will be decided on the basis of improvement in the course, class participation, and regularity of attendance.

This course fulfills several different requirements depending on your degree plan at McMurry. For most of you, it satisfies the requirement for three hours of world perspectives in the Global, Societal, and Personal Perspectives section of the general education requirements. If you’re a history major or minor, it is a required course.
If you’re looking to be certified as a teacher of either history or social studies in the Texas public schools, this class is required. Specifically, this course provides partial fulfillment of the following standards of the TEKS competencies as defined by the State Board of Educator Certification Standards for Teacher Education Candidates:

For a minor in Curriculum and Instruction, with a teaching concentration in **History 8-12**:

**Standard IV. History:** The social studies teacher applies knowledge of significant historical events and developments, as well as of multiple historical interpretations and ideas, in order to facilitate student understanding of relationships between the past, the present, and the future.

For a minor in Curriculum and Instruction, with a teaching concentration in **Social Studies 8-12**, or a major in Curriculum and Instruction with a teaching concentration in **Social Studies 4-8**:

**Standard IV. History:** The social studies teacher applies knowledge of significant historical events and developments, as well as of multiple historical interpretations and ideas, in order to facilitate student understanding of relationships between the past, the present, and the future.

**Standard V. Geography:** The social studies teacher applies knowledge of people, places, and environments to facilitate students’ understanding of geographic relationships in Texas, the United States, and the world.

**Standard IX. Culture:** The social studies teacher understands cultures and how they develop and adapt, and uses this knowledge to enable students to appreciate and respect cultural diversity in Texas, the United States, and the world.

**Standard X. Science, Technology, and Society:** The social studies teacher understands developments in science and technology and uses this knowledge to facilitate student understanding of the social and environmental consequences of scientific discovery and technological innovation.

Note that to get credit for this course in your major, as with all courses in all majors, you’ll need a final grade of a C or better. **A final grade of C- is not considered adequate:** students getting a C- or lower who want to major in history or history teaching must either retake the course or find a different major.
PROPOSED LECTURE AND ASSIGNMENT SCHEDULE

Jan. 18: Introduction

Jan. 20: The World in 1500
Hall, 161

Jan. 23, 25, 27: Ottomans and Mughals
Hall, 163-173

Jan. 30: Quiz 1 on Cable

Jan. 30, Feb. 1: East Asia and the Barbarians
Hall, 175-184

Feb. 3, 6, 8, 10: Western Europe from the
Renaissance to the Enlightenment
Hall, 195-216

Feb. 13: Quiz 2 on Karp

Feb. 13: Beyond the Vistula

Feb. 15, 17: Europe Overseas
Hall, 185-191

Feb. 20: Africa in the Age of the Slave Trade
Hall, 191-193

Feb. 22: First test

Feb. 24, 27, Mar. 1: Western Europe: Mother of Revo-
lutions
Hall, 217-232, 243-255

Mar. 3: Quiz 3 on Burrow
